

WORKSHEET

File Number OIG-90-3117 (M90-09)  
AIG-Oversight

Date 3/8/90

See attached sheets of information taken by AIG/Audit. <sup>External</sup>

Review of [redacted]  
3/23/90 + 3/26/90

Item ① in allegation list of 3/22/90 is not manifested in the proposal [redacted]

Item ②: I found no evidence that NSF made a request for or received a report on P.H.D. productivity in connection with the review of this proposal.

Further the declassification letter and the review record do not support the informant's "rumor" that NSF conducted a "site visit" or that the "site visitors" reported to NSF or that NSF rejected or doubted the report of the site visitors.

Item 3: This is an internal graduate student / faculty / university problem that does not reach NSF.

With the information available, these allegations do not merit further investigation. Our current workload of clearly stated and better documented allegations of misconduct in science can not justify further time or effort on this matter.

I am closing this matter for lack of substance.
